# Foreword

---

The Bell is ringing, the tipping time is on. The world is changing and a world of possibilities is right there, just before us. The Bell is ringing. Time (Tangu ifoueni) to create an African federal state has come.

The Bell (Ngungâ) is also ringing to RE-UNITE this fractured Africa and RE-ASSEMBLE this black skin, that has been scattered away all over the world

Reassemble (Konguela) again towards the center (n'zita dia n'za), I named Kongo, presently Angola territory along with the two Congo, DRC (the Democratic Republic of the Congo), and CR (the Republic of Congo, adding to that the Middle Congo, up to the Great Lakes.

Re-unite the lands of Bornou, Monomotapa, Ethiopia, and Sonrhäi.

Reach the tipping point means ending the existence of all microstates, as defined at the Berlin conference and designed at the time of independence.

Time has come to create the United States of Africa (African United States) to accomplish the peoples' will.

Our heads of states continue to be passive regarding this situation in which they are as powerful kings, they find themselves quite content within the fixed currency pattern with euro (or dollar or yuan).

With this fixed parity, monetary inflation is being maintained, although it does not lead to economic growth, while a necessary condition for any development.

The point is that by doing so, they do not perceive or feign to ignore that times have changed. This sort of extension of the Cfa franc to all the countries of Western Africa is felt like a burden by the young African people who see it like, not only an extension of French colonization but that of Europe all over Africa.

Although they were set free, the former slaves do not wish to stay too far from the master's plant comfort and would rather propose their abundant and affordable working abilities.

The birth of a federal state will end the debate, as the use of a single currency is a vital condition to its very existence.

## Preface

---

For the last twenty years, I have been investing all of my energy into freeing the black Man from mental slavery caused by the violence of both colonization and holy wars (crusades and Jihad) which led Negro-African nations to be dominated through the influence of Christian and Islamic religions.

Drones (everything is under surveillance and tracked by foreigners), laboratory imported diseases (Aids and Ebola, inoculated through vaccines) nuclear plants (turnkey contracts and long-term credits) being as many factors leading to the ownership of our lands with the blessings of our leaders.

The brain drain to the Occident and the extinguishment of our elites by the same predators and by ourselves are as many factors concurring to a new form of slavery and even to the genocide of the Black African Man.

I have been requested, through this book, to catch the spirit leading into the process of creation of the United States of Africa, with the help of both the civil society and the African citizens.

The United States of Africa (USOA) flag, based on the starry Gold Spiral, with rainbow colors, the crest with the eye of Horus, the refrain of the Union Hymn, sung by the citizens placed in position 11 of the “Kemets Sun Salutation”

have suggested me a new world of possibilities for Africa. This USOA flag is an amazing work of art.

The constitution of gold reserves, which profitability will be increased through private businesses, the soft water project that will be taken through the arid lands of the continent, the project of construction of the replica of the SAQQARA pyramid (meant to be the poles of both knowledge and university), has convinced me once and for all, that Africa is meant to be the desirable future of humanity, as she is already said to be the cradle of mankind.

Arsène Francoeur NGANGA

Research-Professor in History/Marien NGOUABI University

Presently (2019-2020) studying in writing house at Brown University, Rhode Island the USA

# 1. African States of the continent and Overseas Territories

---

The citizen and the civil society will drive to the creation of an embryo of the African federal state, of African states, before being extended to the people from African descent from Overseas.

African people should from now on, be on the move, stop complaining and start challenging, stop incantation and, take action and, start anticipation.

In 2020, the civil society and the citizens are going to discuss the feasibility and the opportunity to proceed, seriously, to the symbolic creation of the United States of Africa, the United African States, U.A.S.

African United States/UAS will make the debate concerning the microstates criterion convergence irrelevant because the adoption of the single currency is the backbone and foundation leading to the very existence of this nations' union.

Can we anticipate on our common future?

Initialize the collection of public and private savings (that of the citizen becoming a shareholder/actor) to gather the gold and currency reserves, needed for the creation of the single currency of the African federal State.

Define our own "backbones and foundations", both politically and economically speaking, to get to the union of African states
